

## GLI ESSERI VIVENTI ANIMALI E VEGETALI

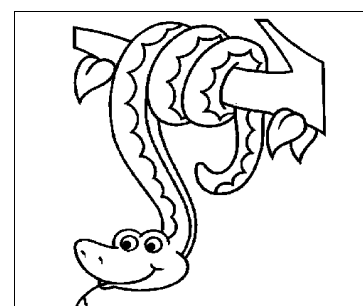

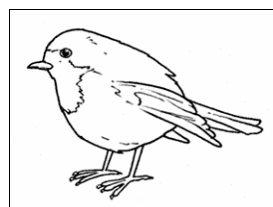

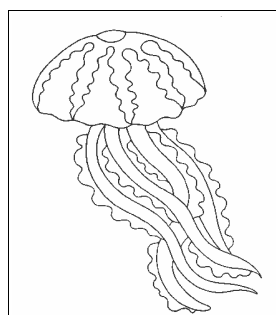

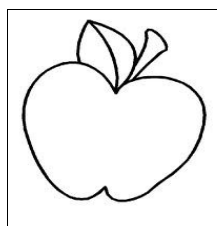

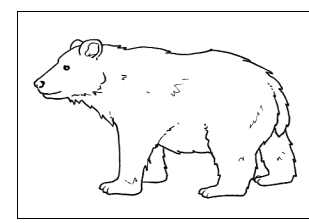

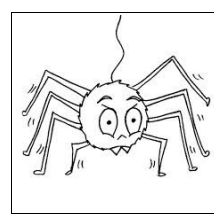

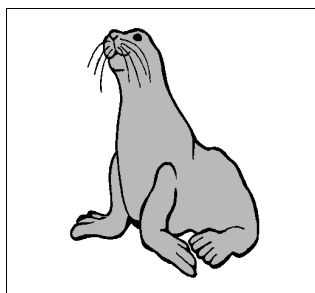

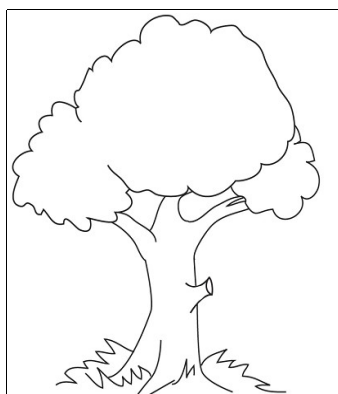

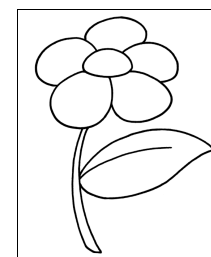

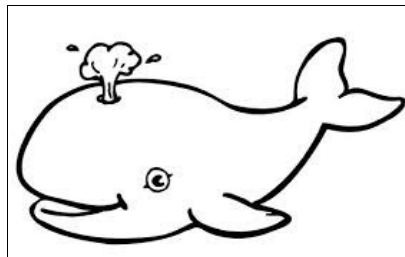

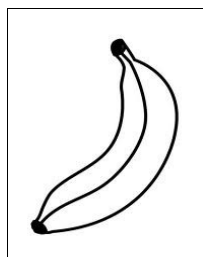

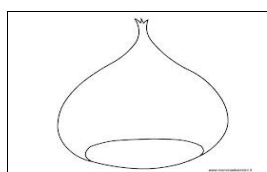

Gli esseri viventi si dividono in due gruppi: **gli animali e i vegetali**.

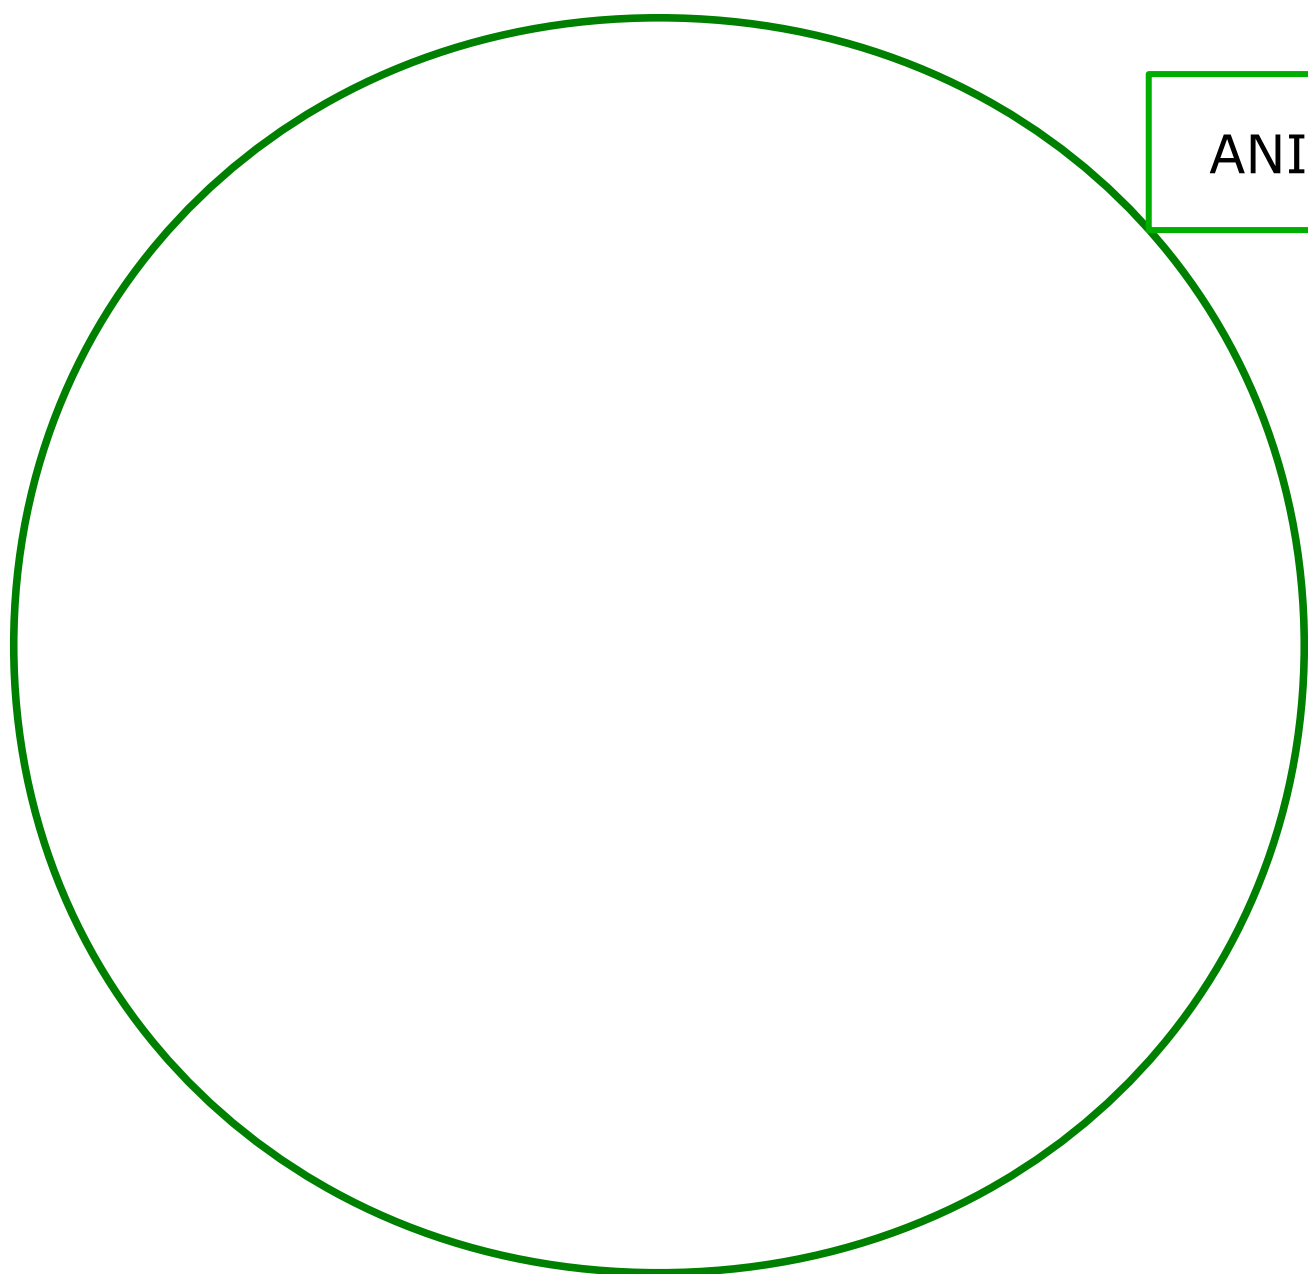

**I vegetali** comprendono tutte le piante, da quelle più grandi e mestose a quelle più piccole e fragili.

Animali e vegetali svolgono tutti le stesse **funzioni vitali**: nascono, si nutrono, crescono, si riproducono e muoiono.

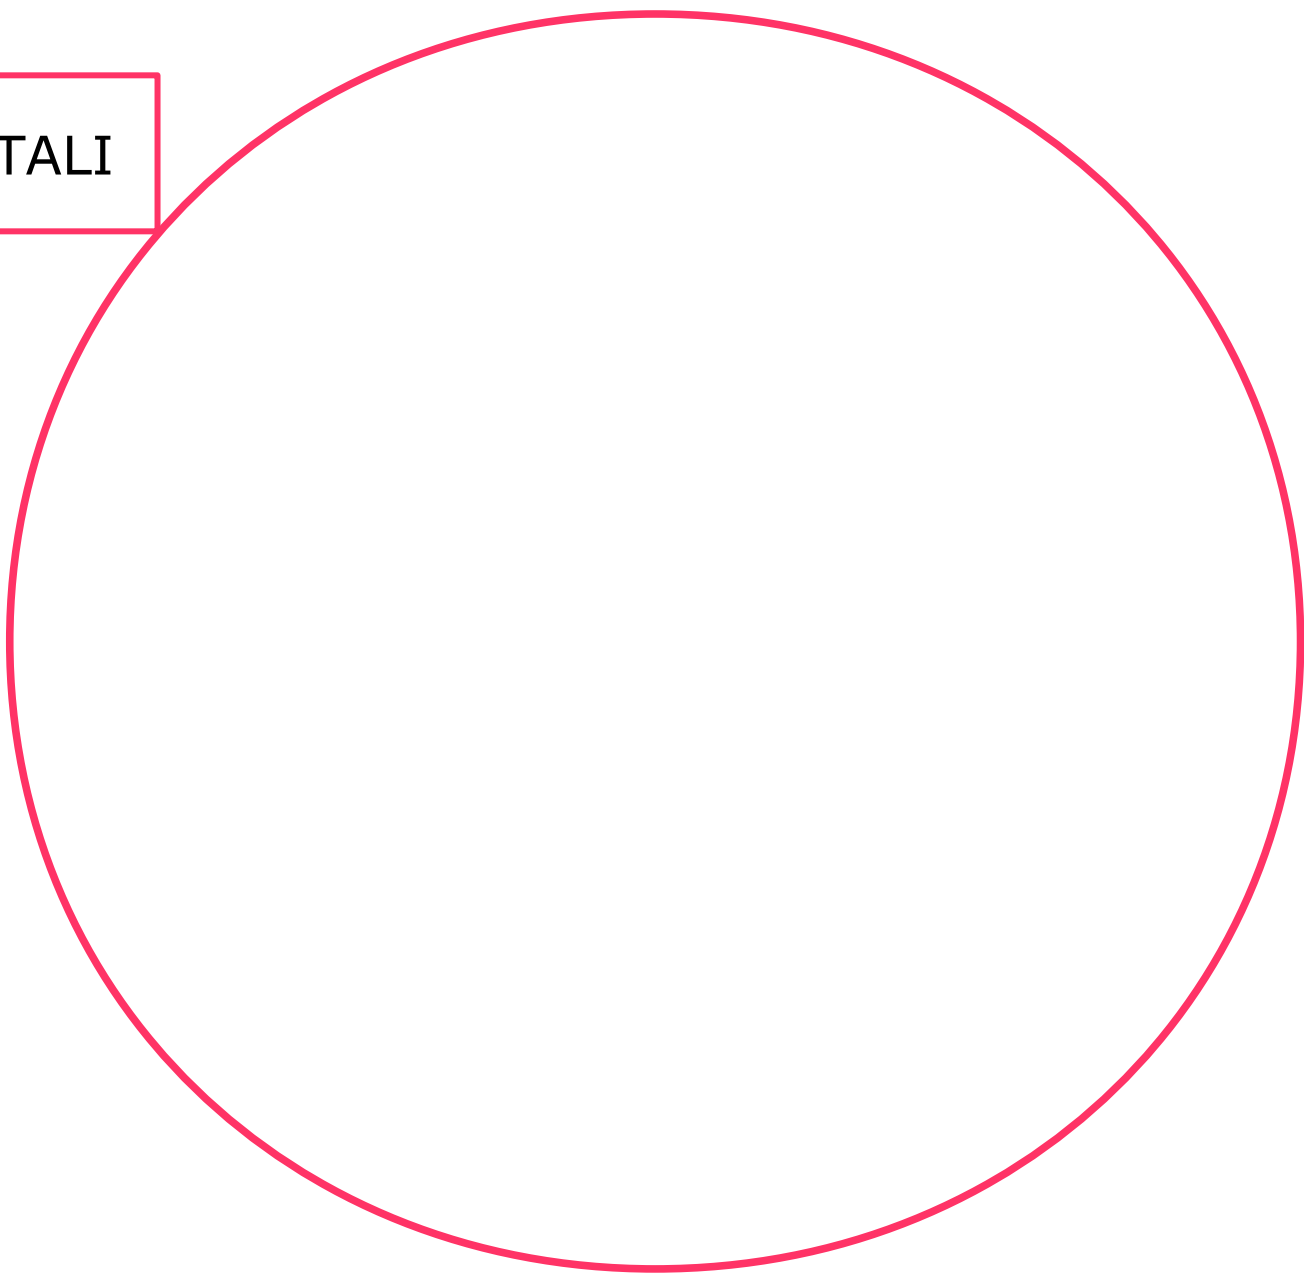

**Ora tocca a te**: classifica animali e vegetali
